SECTION - I

1. INTRODUCTION

1.1 Project Background

- 1.1.1. The Govt of Chhattisgarh is developing Naya Raipur as Administrative capital of State. Naya Raipur Development Authority (NRDA) has been established by the Govt of Chhattisgarh as a planning and development authority for the Naya Raipur city. As a part of City development NRDA is developing a Central Business district near the Capital Complex area. Apart from secretariat and Head of the dept building, NRDA is constructing complexes for residential & commercial usages within the CBD area.
- 1.1.2. Naya Raipur Development Authority (NRDA or Authority) intends to develop **“Storm water Drainage system and conservation of water bodies at Naya Raipur”**.
- 1.1.3. Details of the area identified for these developments are detailed in Annexure 1 of the document. Please note that the design brief is tentative and selected consultant will have to finalize the design brief with NRDA after award of the project.
- 1.1.4. **The proposed space has to be designed as per applicable bye laws and Urban Design Guidelines of Naya Raipur and development regulations.**
With the aforesaid objective, NRDA(Authority) invites proposals in prescribed format from Firms/ Team of Architects and Engineers for selection of **“Technical Consultant”** for the **“Planning and Designing for the Development of Storm water Drainage system and conservation of water bodies at Naya Raipur”** (the Project)
- 1.1.5. Applicants are invited to submit the technical proposal for providing consultancy services required for the Project. The Applicants who submit the Proposal shall be called Applicants. The Proposal would form the basis of selection of the Applicants. The successful Applicant shall be called Technical Consultant. After selection a letter of award would be sent to the Technical Consultant and shall be insisted for signing of the Service Agreement between the Authority and the Technical Consultant for providing the Services.
- 1.1.6. The Scope of work (SOW) and design Requirement for the Project has been set out in Section II.
- 1.1.7. The consultancy services as detailed in the RFP are to be provided at a **Percentage fixed fee** as detailed in para 5 in section I here under.
- 1.1.8. The Authority shall receive Proposals pursuant to this RFP in accordance with the terms set forth in this RFP and other documents to be provided by the Authority (collectively the "Proposal Documents"), as modified, altered, amended and clarified from time to time by the Authority, and all Proposals shall be prepared and submitted in accordance with such terms.
- 1.1.9. The statements and explanations contained in this RFP are intended to provide a proper understanding to the applicants about the subject matter of this RFP and should not be construed or interpreted as limiting in any way or manner the scope of services and obligations of the Technical Consultant set forth in the Agreement or the Authority's rights to amend, alter, change, supplement or clarify the scope of work, to be awarded pursuant to this RFP or the terms thereof or contained herein. Consequently, any omissions, conflicts or contradictions in the Proposal Documents including this RFP are to be noted, interpreted and applied appropriately to give effect to this intent, and no claims on that account shall be entertained by the Authority.
- 1.1.10. **The Selection process:**
The Authority has adopted the evaluation and selection process in three cover system. The Applicants are required to submit their proposal through Key Submissions (Cover -1) and Technical Proposal (Cover . 2) .Both the envelopes shall be placed in the third outer cover. This shall be followed by presentation before the jury. The selected consultant shall be paid a fixed fee as detailed in the RFP.

- 1.1.11. During the Proposal Stage, Applicants are invited to visit the site and examine the parameter and scope of work in detail, and to carry out, at their cost, such studies as may be required for submitting their respective Proposals for the Project. The selected Applicants shall be required to give a presentation before the jury.

Any queries or request for additional information concerning this RFP shall be submitted in writing or by fax and e-mail to the officer designated. The envelopes/ communication shall clearly bear the following identification/ title: "**Queries/Request for Additional Information: Proposal for the Selection of ("Technical Consultant") for the "Planning and Designing for the Development of Storm water Drainage system and conservation of water bodies at at Naya Raipur"**".

2. SCOPE OF WORK

Broad Scope of services

NRDA intends to develop master plans for storm water management system and conservation of water bodies at Naya Raipur. The broad scope of work also includes;

- a. Preparation of Integrated Storm water Drainage Master plan that manages the quality and quantity of storm water runoff of the region avoiding any water logging in the area.
- b. Preparation of Comprehensive Design of storm water Drainage Design systems and conservation of water bodies of Naya Raipur (Drainage Layout Plans, development of embankments, detailed design of conservation plans, Landscaping and preparation of working drawings) including preparation of cost estimates, bills of quantities, Obtaining the statutory approval, assistance to PMC in framing the tender document for project execution and periodic site supervision of project.

The broad scope of services shall include but not limited to the following,

1. Carry out case studies of best designed similar urban Drainage and conservation works in India and abroad and develop detail design brief in Consultation with the authority,
2. Site assessment study, Hydrological survey, Topographic survey, Geotechnical & soil investigation for the work,
3. Preparation of Conceptual Drainage plan.
4. Preparation of map in ARC GIS Format, proposals of NRDP etc on the basis of available data SOI maps and available satellite images.
5. Overall design of the full site in the form of outer block design, elevations, 3D forms, walkthrough and with clear cut identification of the area for the first phase of the development.
6. Preparation of comprehensive Design for the full phase of development.
7. Preparation of water Conservation Plan and Design for the full phase of development.
8. Obtaining the statutory approvals and other required clearances.
9. Preparation of detailed cost estimates , Rate analysis and all working drawings good for construction
10. Preparation of BOQs, specifications & Drawings,
11. Bid process management for appointment of contractor
12. Periodic supervision and coordination with PMC, NRDA and contractor during construction
13. Preparation of Maintenance manual.

Part 1

Stage 1: Conceptual design and block cost

The consultant shall:

1. Carry out study case studies of best designed Public parks having area more than 50 Ha and landscaping of Parks, Avenue development, Flyovers, Junctions in India or abroad and its application in the project.
2. Study of Development plan, Urban Design Guidelines, GDCR of Naya Raipur and study of local Architecture of Chhattisgarh
3. Prepare a design brief after taking into consideration the Client's requirements and discussion with concerned departments for detail Zoning plan, activities, functional relationship, space requirement and site Planning.

4. **Survey and investigation** : Conduct detailed site survey identifying all physical features along the natural drains, water bodies, canal works and generate contours, detailed Site Evaluation, soil investigation survey, hydro graphic survey, hydro. geological studies, Site analysis / opportunities and constraints study, analysis of up-coming architectural character, connectivity, social issues and heritage. The consultant shall integrate the existing available survey data for planning. The map should be prepared in ARC GIS Format, proposals of NRDP etc on the basis of available data SOI maps and available satellite images.
Physical survey: The Consultant shall survey land only falling under the storm water drain area and the required buffer of 25mts on both side of the drain at every 10m interval for designing the storm water infrastructures, update and carryout ground truthing for the area and prepare contour map with 0.25m contour interval. The data from the these surveys shall be made available, in (x,y,z) format for use in a sophisticated Digital Terrain Model (DTM). The survey shall demarcate all the physical features such as trees, water bodies, electric lines, structures, etc. The survey data shall also be superimposed on cadastral data. The Consultants shall be fully responsible for the accuracy of surveys.
 - **Hydrographic Survey:** The Consultant shall collect information on highest flood level (HFL), low water levels (LWL), discharge velocity etc. from available past records, local enquiries and visible signs, if any, on the structural components and embankments. The Consultant shall obtain the rain fall data as well as make local enquiry to arrive at the design intensity of rainfall.
 - **Ownership Record:** The consultant shall prepare detail data base regarding the ownership and khasara no and area data falling under the proposed road or road widening.
 - **Soil Investigation:** Soil tests as per relevant IS/IRC Standards have to be done by consultants to arrive at design parameters for the formation and safe bearing capacity. At locations proposed for important structures etc., at least one bore hole for every such structures, should be a to determine the SPT N values at depth specified in the relevant IS codes. Soil samples taken from boreholes should be visually classified, index properties determined and presented in along with the final report. These bore holes should be normally taken to a depth whose N value is greater than 100 plus a further 3m depth (to account for any drastic fall in N value below these strata.). The subsurface water at each borehole be sampled and a chemical analysis carried out, to recommend appropriate cement/admixture for use in concrete mixed for the foundations. Recommendations of a geo-technical expert should be furnished in the soil report and should cover aspects e.g., appropriate soil stabilization measures if required, bearing capacity of the founding strata.
 - **Note: All the surveys shall be carried out in the presence of NRDA representative.**
5. **Reviewing the existing situation, and undertaking necessary assessments;** The consultants would review the present situation in the planning area, and analyze the current strengths and weaknesses for providing efficient system.
 - i. Review of existing system, survey of the existing drains sizes,
 - ii. Catchment areas, location, width of roads etc.
 - iii. Preparation contour map for the entire area
 - iv. Establish design principles and prepare options;
 - v. Select options, priorities and cost interventions;
 - vi. Prepare final comprehensive Storm Water Drainage (including sullage if any)
 - vii. Study report including identifying priority works
 - viii. Recommend improved institutional arrangements for effective
 - ix. Operation and maintenance
6. Study the micro climate of the region, Study of Catchment area, Study of Drainage Networks
7. Study of existing canal networks, Study of water conservation plans, Study of flora, species, plants, and its suitability for the project, Study of offsite infrastructure.
8. Study Site and Capacity analysis to develop design options.
9. Methodology and team deployment plan for project
10. *Prepare broad cost estimates of each option*
11. *Prepare a report for 2 option of concept design containing all the above clearly bringing out the design thought process and comparison of options.*

12. *Submit the draft conceptual layout, block estimate of cost and the report as described under sub para 1 to 4 above. And get the block estimate cost approved.*
